Fullstack webdeveloper
Experience

Full-stack web developer
Freelance
2023 - Present

- Implemented software developments and changes for multiple clients from different platforms like upwork.
- Developed new support and feedback systems implemented within my client's websites.
- Generated back-end programming using software systems
- Well familiar with payment integration systems.

Completed Projects
A Library inventory system
2023 -

- Developed a functional application for a school in a remote area of Kenya
- The app is primarily used to track book records within the library.
- This helped solve the problem where the books were tracked manually leading to loss.
- Provided technical support when necessary

Skills

- Rust(basic)
- Javascript/Typescript
- HTML5/CSS3
- Express js
- Nodejs
- Git
- MongoDB
- REACT
- GCP

Education

University of Helsinki
Completed their Fullstack course.
2022 - 2023

- Got a certificate for completing the University of Helsinki course dubbed the FullStack Open.
- During this time I acquired vast knowledge on software development through building complex full stack applications and deploying them to Heroku.

University of Nairobi

2020 - Current

- Currently in my final undertaking a four years undergrad degree in Biotechnology looking forward to graduating.
- An active member of the UON coding club.

Abilities

- Knowledge of Multiple Coding Languages
- Proficiency in Software Systems and Computer Operating Structures
- Highly technical with Problem Solving Skills
- Communication Skills as I am well conversant in speaking English.
- Growing and developing interests in building in WEB3 building on both Ethereum and Solana.
